

# Jhon Sebastian Delgado A.

Full-Stack Developer · AI Integration Engineer · .NET / Backend

4+ years building high-performance interfaces and AI-powered systems.  
React/Angular frontends, Python/FastAPI & .NET backends, autonomous  
AI agents with RAG and Function Calling on GCP/Vertex AI. Technical  
lead on production petroleum analytics, AI Agent platforms, and e-commerce ERPs.

## TECHNICAL SKILLS

### FRONTEND

React Angular TypeScript Redux Toolkit  
React Query Zustand Vite Zod Ant Design  
ECharts Hexagonal Arch.

### AI & BACKEND

Python FastAPI Vertex AI (Gemini) RAG Engine  
Function Calling LLM Agents Node / Express  
.NET (Umbraco) Supabase Edge Fn. BFF Pattern

### CLOUD & INFRASTRUCTURE

GCP PostgreSQL MongoDB Supabase  
Vercel Railway Cloudflare Tunnel OAuth / Auth  
CI/CD

### QUALITY & PRACTICES

Jest React Testing Library MSW Lighthouse / Perf  
RBAC PR Review Tech Leadership

## EXPERIENCE

### Enovate

Apr 2024 – Present · 2 yrs

Mid-Senior Full-Stack Developer · AI Integration

- › **AI Agent Platform:** Built autonomous agents using Vertex AI (Gemini) with RAG Engine and Function Calling, enabling natural-language interactions over production data.
- › **Petroleum Analytics (W&T Offshore):** Led frontend architecture with React + ECharts for real-time telemetry visualization across petroleum wells, handling large metadata volumes with optimized rendering.
- › **Platform Re-engineering:** Led full restructuring of a core Angular platform applying Clean Architecture (Hexagonal), improving scalability and maintainability.
- › **Internal Ecosystem:** Designed and published private NPM UI libraries, standardizing components and business logic to reduce team delivery time.
- › **Technical Leadership:** Coordinated junior/mid developers, led PR reviews, defined coding standards and architectural decisions.

### Newshore by Flyr

Nov 2022 – Mar 2024 · 1.5 yrs

Advanced Software Engineer — UI

- › **Avianca Check-in:** Built and optimized the passenger check-in flow for Avianca, ensuring high-performance UX at scale.
- › **Payment Logic:** Developed POS-based split payment validation scripts enabling divided payments with transaction integrity.
- › **Metasearch Integration:** Built and validated Deeplink systems for mass redirection, improving external channel conversion.
- › **Hybrid Stack:** Managed Angular + TypeScript integration with .NET Umbraco CMS for the main web platform.

Angular TypeScript .NET / Umbraco POS Integration Deeplinks

### Geekcore

Feb 2022 – Sep 2022 · 8 mo

Junior Frontend Developer

- › Built web portals using React JS with Redux and Ant Design; REST API consumption and component architecture.

React Redux Ant Design

## INDEPENDENT PROJECTS

Aluna Tyquy — E-commerce + ERP

Live in Production

- › **Full E-commerce + ERP:** Built solo end-to-end — online store for food business combined with a custom operational management system for orders, logistics, and accounting.
- › **AI Chatbot + RBAC Auth:** Conversational assistant with Gemini API; role-based access for Admin, Drivers, and Customers with magic link flows.
- › **Financial Engine:** Defensive SQL separating net sales from delivery fees, mining order JSON lines for accurate unit counts and net average ticket.
- › **Dynamic Excel Export:** Double-pass algorithm auto-generates columns per product variant — new variants appear without code changes.
- › **State Machine + Rollback:** Order reversal capability with silent webhook (Deno/Brevo) suppressing duplicate notifications automatically.

Gym Management Platform

In Progress · 2026

- › **Member Management:** Full CRUD for members, plans (1 day / 15 days / 1 month / 1 year), manual and online payments, and role-based portal for admin, receptionist, and member.
- › **Hardware Integration:** ZKTeco inBio Pro biometric access control via Push SDK (iClock/ADMS protocol); membership expiry auto-revokes card access through pg\_cron + Railway.
- › **Payments:** Bold gateway (Nequi, DaviPlata, PSE, cards) with webhook idempotency and Cloudflare Tunnel for local device communication.
- › **Notifications:** Automated email flows via Brevo (Supabase Edge Functions / Deno).
